Color plugs for key heads

For many years now, every one of our cylinders is soled with a bag of 10 color plastic plugs for marking the key-heads.

However, we have come to realize that with most product having 2, 3, or 5 keys at the most, five out of every pack of 10 are being thrown away by the customer!

Therefore, to enhance our efficiency - during October we will change the quantity, and every package will contain only 5 color plastic plugs, of the most popular colors: **Green, Red, Yellow, Orange & White!**

We feel certain that you will keep on making the most out of this unique feature, which the market has come to appreciate over the years.

The 5 colors, packed in a small plastic bag, will be included in every package sold to our customers, but all 10 colors will still be available in bags of 500, under the following P/N:

1. For the Metallic keys (all Nickel Silver):

PART NUMBER	DESCRIPTION
