## Unified Rim Body

Rim cylinder is one of the big players in our cylinder range...and we have two sizes of bodies one longer than the other by only 2.1 mm.

To make everyone's life easier we will stop the production of the longer one.

To avoid the need to change plugs, use a 2.1 mm spacer ring (p/n 51055277).

Please prepare yourself with sufficient quantity of rings to be ready when new bodies come.

Product assembled in the factory will use the ring as soon as stock of longer bodies will run down.
