ON LINE UPDATE

Tech. Update

No. 236

Date: 28.07.2011

INTERACTIVE⁺ *is almost here 2*

Following our previous announcement (On line # 233) we are now ready to announce that effective from August 2011 we will be ready with the new key blanks as well !

This new key is backward compatible – meaning that new patented key will work with older Interactive cylinders – but old keys will not work in new **INTERACTIVE⁺** cylinders.

To help you identify new items

- The square key head now has a superior new design with high tech blue color (RAL 5013)
- The colored dot (insert) will be the same square one as used in the MT5
- Keyways (profiles) will be the same as the existing ones
- New part numbers will be set up as per orders placed in the system, for boxes of 50.

At this time we want to encourage you to move out as much old stock as you can...while keeping FIFO (first in, first out) in mind so you will be ready when next step is coming.

Please note that this announcement is for key blanks only. Cut keys supplied with existing Interactive cylinders will remain unchanged until further notice/product launch in your market.
