Interactive+ - New platform sticker

With the new Interactive+ products going into the market, a new platform sticker has been added.

The sticker is in a different color from the other Interactive sticker to clearly differentiate it. The size and format was changed in response to customer's requests to have the sticker visible from two sides of the package.

The stickers for the other platforms will be changed to this new format over time but they will keep their same colors.

The serial number for orders of the new sticker is 89100073.
Please use it for Interactive+ orders.
