

PRODUCT UPDATE

No. 255

Date: 07.01.2013

Interactive+ key head - minor technical change

As you can see from the below, we have slightly rounded the sides of the key ring hole. The change enables us to produce the keys on three of our plastic molding machines instead of producing only with the newest one.

The change is very minor and difficult to recognize. It does not have any effect on the overall look and trademark.

Although minor - we wanted to keep you informed in the event you receive questions from the market.

New key

Previous key head
