Date: 05.10.2014

A whole New Rainbow of Colors

Multi-color options for key heads were always well received by our dealers and are also frequently requested by their end user customers.

We are happy to introduce new options of key colored heads in all of our platforms.

MT5 and MT5⁺

The current dual component key blanks will now be offered in three additional color combinations.

These will also be available as part of an assembled product (cylinder and keys). In this option colors will be a random mix.

The single color key (with insert) is now available in all colors.

Interactive⁺

The current key blanks with the Interactive⁺ design and Blue color are now also available in all previous key head shapes and in all colors.

Contact your sales representative for details and orders.
