New Coupling for Mul-T-Lock Single Cylinder

As part of our continuously improvement process, we are pleased to inform you of a new design for the single cylinders coupling.

84600011 – Previous Design
(Made of 3 components)

84600073 – NEW Design
(Single solid part)

The new coupling design is one piece, made in sinter technology (Steel Sint.FO 140).

New P/N is available as shown in the above drawing. Existing P/N will be blocked for orders once stock ends.

There is no effect on cylinder functionality and all assembled cylinders will remain with the same P/N's.
