Single Modular System Design - UPDATE

Following recent updates related with Mul-T-Lock Euro profile modular design (online update 267), we are pleased to inform you of complementary update to the design of the **single** Modular Euro solution, as well as new certification for the new Modular design.

1. A New bar (connector) for Single Modular Cylinder

We are now ready with the new modular bar (connector) design, also for the single modular cylinder.

It improves the modular strength, providing the solution with higher pulling resistance as well as higher corrosion resistance.

New bar for single cylinder

New P/N's are available as shown in the below table. Existing P/N's will be blocked for orders once stock ends.

No.	Cat. No	Description
1	84401121	Bar 1
2	84401122	Bar 2
3	84401123	Bar 3
4	84401124	Bar 4
5	84401125	Bar 5

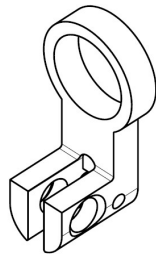

PRODUCT UPDATE

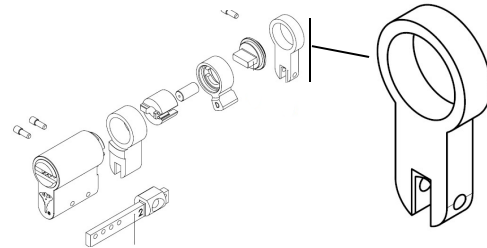

2. A New Adaptor for Single Modular Cylinder

The new bar (connector) for single modular, result a change also of the adaptor for single modular cylinder.

The M5 thread is part of the new bar (connector).

Old (PN 51207080)

New (PN 84400071)

The new Adaptor is compatible **only** with the new single modular bar (connector).
Old Adaptor will be available until you will finish your old bars (connector) stock.
Please verify handling this transition effectively.

Please use the updated Modular cylinder & assembly instructions 84401006 – D version

3. New Modular system design SKG*** (3 stars) certification

In light of the market demands, we have certified the new Modular design with the Interactive and the ClassicPro keying system for SKG*** (three stars).

Certifications are available in the Partner zone for your convenience.
