I.C.C Schlage cylinder Improvement

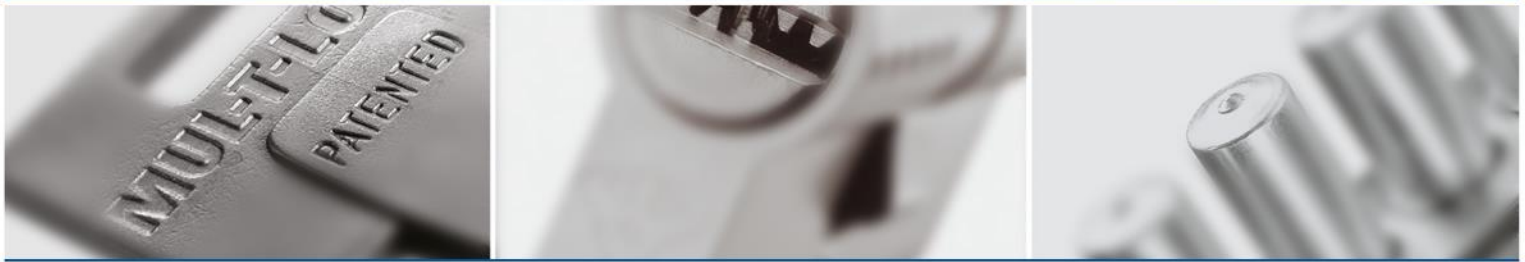

we are happy to share with you an improvement that we have done to the I.C.C Schlage MTL400 & MTL600 Cylinders.

The new configuration is identical to the configuration of the MT5/MTL800 cylinders which has been proven for several years.

New cylinders will be produced and supplied with the new configuration.

PRODUCT UPDATE

In most of the applications no tail is needed but if you need one, use tail as shown below:

This new configuration is also allowing the use of the OEM tails that may be already supplied with the locks.

When you order those cylinders in parts (not assembled) the plug is only the different part.

Enclosed are the P/Ns of the new plugs:
