## **Master key system File - update**

In light of market demand and as part of our continuously improvement process, we would like to inform you on a change for the format we will provide you with the master key system plans designed by Mul-T-Lock.

The master key system plan will be sent as a secure ZIP file by the relevant marketing coordinator.

The default password for the file will be the order number.

This number will not be present in the mail, however, it will be mention to use it in order to view the file.

This change is effective immediately for all existing and future orders.

By this, we eliminates the use of CD's / mini discs for this purpose (PN 98101174), ensuring high environmental and security standard Mul-T-Lock is known for while keeping customer convenience.
