PRODUCT UPDATE 328 – SBNE 12 Padlock Next Generation

We are proud to present the next generation of our **SBNE 12 Padlock**.

This new model presents:

- Standard version is Slam-to-Lock.
- Can be easily modified from Slam-to-Lock version to Key-to-Lock version, by simply replacing the marked components (see next page).
- Enhanced secured mechanism, which is also Patent Pending.
- Certification EN12320 standard, Grade 5 – in process.
- Pop up locking bolt activated by a spring-loaded push mechanism.
- The body is longer by 8mm, allowing space for the push mechanism (see next page).
- Locking pin is inserted from the bottom of the padlock, adding new components to protect the locking pin.

We will use new part numbers. Looking forward for your orders.
