Product update 325 - New packaging for 2xMVP™1000

Since most MVP™1000 locks are needed in pairs, keyed alike, we have designed a new packaging that will contain two locks along with all necessary components, as shown below.

This change will take effect once the current stock is depleted (estimated around the end of the year).

Please note:

1. The part number used to order a set of two locks will remain the same.
2. The box will include only one assembly tool and one installation manual.
3. Single lock will continue to be available as usual.
