Product update 326 - New unified packaging for 2xMVP™2000

Since most MVP™2000 locks are needed in pairs, keyed alike, we have designed a new packaging that will contain two locks (Rear + Side) along with the regular necessary components (thus achieving better efficiency and sustainability), as shown below.

This change will take effect once the current stock is depleted (estimated beginning of 2025).

Please note:

1. The part numbers already used to order a set of two locks will remain the same.
2. Single locks (Rear, Side) will continue to be available as usual.
